

# *LED-pumped Gain Modules*

## Laser Technology Redefined

Revolutionary Breakthrough in LED-  
Pumping for Solid-State Lasers

## KEY Advantages

- ✓ Ultra-long lifetime – 10.000+ hours
- ✓ Superior reliability – predictable performance
- ✓ Low thermal load – uniform pumping
- ✓ Cost-effective – beneficial TOC
- ✓ Efficient – low power consumption

LEDias combines LED and solid-state laser technology to develop high-performance, cost-effective light source solutions. The LED pumping technology provides stable and reliable laser light for industrial processing, medical diagnostics, LiDAR mapping, and scientific research.
